

POLYMOLDING
THE FUTURE OF EXPANDED POLYSTYRENE

EPS Virgin Beads

EPS beads are 98% air and when in bean bags, they are 3-5mm in diameter. They're also resistant to heat and moisture. EPS isn't biodegradable, however, it can be recycled and reused in many ways. EPS beads are light weight, firm and are water resistant.

Advantages of EPS:

- ◆ Recyclable
- ◆ Long Term Warranty
- ◆ Lightweight
- ◆ Proven performance
- ◆ Fire resistant
- ◆ Cost effective
