## EPS SURF BOARDS

EPS Surfboards has become a popular option today for several reasons. One of the most notable is the weight.

EPS foam is much lighter other materials that are used to build surfboard which makes for a great option for the surfers that enjoy a better performing board. Lighter boards are easier to maneuver in the water.

Blocks are molded to 48" x 36" x 192" and we can make any cuts within those dimensions

### Advantages of EPS:

- ◆ Recyclable
- ◆ Long Term Warranty
- ◆ Lightweight
- ◆ Proven performance
- ◆ Fire resistant
- ◆ Cost effective
