

POLYMOLDING
THE FUTURE OF EXPANDED POLYSTYRENE

EPS PACKAGING

We can manufacture custom EPS packaging and stock packaging products which are designed to protect, insulate and cushion products when stored or shipped.

EPS can be produced to your specific measurement, dimensions, and forms to any custom shape in various densities. When considering custom shapes, EPS CNC guided fabricating does not require any additional tooling charges.

EPS is the perfect alternative to corrugated and other packaging materials. The versatile nature of EPS foam allows for a vast array of protective packaging uses.

Advantages of EPS:

- ◆ Recyclable
- ◆ Long Term Warranty
- ◆ Lightweight
- ◆ Proven performance
- ◆ Fire resistant
- ◆ Cost effective
